

EXPRESS-PAK[®]

Now is the time to invest in a "Software Package" that works to increase your bottom-line, while decreasing your overhead. **EXPRESS-PAK[®]** is designed by a company that has been providing computer solutions to the time-sensitive delivery industry for twenty years. ***This software package really works!***

Fit-your-needs-Flexibility. We have a library of interchangeable software modules that allow for "switch selectable" tuning of every package to best fit your individual needs.

Speed Enhancers. With our enhanced database capabilities, we boost your data input with user speed features, such as type-ahead, global Pickup/Delivery addresses, as well as service-enabled Email PODs, and Email Price Sheets and Invoices - just to name a few of our standard features.

Power Tools. As your business grows, so does your need for more software automation and data control. ASCAR's Power Toolbox offers a wide selection of software that will increase your abilities and effectiveness - such as our Web-Pak module for web order entry. In addition, we also have software packages for Trucking and Air freight operations.

Not just a pretty face. Now you can have the built-in ability to satisfy the point-and-click user as well as the Unix-speed user. This special feature accommodates Windows, Linux or Unix using a PC or workstation

World-class Support. The ASCAR support group is on stand by, waiting for your support request via hotline and email. The qualified and experienced response of your support personnel is there when you need it. Whether you are across the street, or across the world, our on-line assistance is as good as if we were across your desk!
